

BRM™

Botanical Reference Materials

Tools for Identity
Verification

 ChromaDex®

Hotline/QQ: 400-666-7788

BRMs™ are designed as tools to meet the requirements of 100% identity as defined by the cGMPs on dietary supplements.

BRMs™ are suitable for:

- **100% Identity Verification**
- **Method Validation**
- **System Suitability**
- **Product Development**
- **Qualitative Analysis**
- **Impurity Profiling**
- **Safety and Quality Testing**

Botanical Refer

BRM™ - Botanical Reference Materials

Botanical Reference Materials (BRM™) are well characterized reference materials for specific plants. ChromaDex® offers a complete and growing product line of BRMs™ to provide users with the tools necessary to better evaluate the identity of botanical raw materials. A few examples currently offered by ChromaDex® are:

- VBRM™ A Botanical Reference Material traceable to a voucher specimen.
- BRM™ A standard Botanical Reference Material without a voucher specimen.
- rBRM™ A “representative” Botanical Reference Material without a voucher specimen.

All BRMs™ have a Certificate of Analysis containing an HP-TLC profile. Further data will be provided to verify product identity, which may include macroscopic and microscopic information. When available, a BRM™ can be traceable to a voucher specimen. Please see Tech Tip 0002 for more detailed information on our BRM product grades or contact our technical sales group for further details.

ChromaDex® is the exclusive supplier of rBRMs™ (a trademark of Phyto-Technologies, Inc.). As a composite of multiple authenticated samples from indigenous and traditional sources grown in various locations, this BRM™ is truly representative of the plant.
